TECHNICAL RIDER

What we need

To make it a great show together, we ask the organisation to provide the following.

Sound

- Microphones for solo instruments, conductor, etc.
- Speakers for the audience

Lighting

- Basic stage lighting
- Extra lighting for specific effects (optional)

Stage

- Solid stage area with enough room for all members of the brass band (depending on line-up size)
- Stage riser, if needed

Dressing room

- A lockable dressing room where the artists can change and store their personal belongings safely

Indoors or outdoors

- Outdoors, a covered area such as a tent or canopy is always required, where all members can stand and play. This keeps instruments and musicians dry.
- Woodwind and brass instruments and expensive equipment in particular can be seriously damaged by moisture. This facility is the responsibility of the organisation and essential for the performance to go ahead.

Food & drinks

- Water, soft drinks and snacks for band members and crew, before and during the performance
- For long performances or rehearsals: catering

Transport & logistics

- Parking for loading and unloading, as close to the venue as possible
- Reserved parking for all band members' vehicles
